

Scavenger Hunt

Directions: We will be making observations of a local ecosystem. Each group will have a clipboard, pencil and Activity 1 Worksheet. Each group will decide on one person to be the data recorder. Your group must answer the following questions in the spaces below.

1. Describe the site or habitat. Be as descriptive as possible on what you see.
We think that there are lots of mud, and trees and lots of animal life

2. What animals do you see? List all that you observe on land and in the water.
Crows, birds, insects, humans
bees, minnows, otters, ducks
Egrets

2. Describe the habitat component. What do you see might be sources or places for organisms to find -

Food - plants, other animals, food that humans dispose
Water - water, tide, ponds, oceans, rivers
Cover or Shelter - trees, under the deck plants
Place to raise young - under ground, trees, in water
