

Station 1

Activity 1 Worksheet- 20/20 Global Challenge
Topic: Biodiversity and Ecosystem Losses

Juliana State

Scavenger Hunt

Directions: We will be making observations of a local ecosystem. Each group will have a clipboard, pencil and Activity 1 Worksheet. Each group will decide on one person to be the data recorder. Your group must answer the following questions in the spaces below.

1. Describe the site or habitat. Be as descriptive as possible on what you see.

Our habitat has Marsh lots
of birds, fish, oysters and Boats.
Our habitat smells bad,

2. What animals do you see? List all that you observe on land and in the water.

A Duck, a pelican, a white egret,
Puffins, fish and tweety bird.
Spoonbill, Seagle, grey egret, humans,
hawk and shrimp

2. Describe the habitat component. What do you see might be sources or places for organisms to find -

Food fish, Jellyfish, and oysters

Water the sea and near by lakes

Cover or Shelter marsh, water, plants, mud

Place to raise young marsh, water, other plants
